## Children's Day

***"Children are the world's most valuable resource and its best hope for the future."***

***– John F. Kennedy***

Children's Day was a magical celebration for the students of Classes I and II on November 14, 2024, filled with vibrant colors and joyous laughter. The day began with a delightful class assembly where the young stars showcased their talent through enchanting songs, dances, and skits. The highlight of the event was the ramp walk, where children, dressed as their favorite cartoon characters and superheroes, confidently walked down the runway, delivering their punchlines with flair and excitement. The fun continued as the students watched a captivating movie, danced to their favorite tunes, and participated in a variety of games which left the corridors buzzing with laughter and cheers. The day concluded with teachers bestowing small tokens of love upon each child, leaving them with hearts full of happiness and cherished memories. It was a day where the spirit of childhood was celebrated in the most delightful way.

## Astronomy Session

***"The cosmos is within us. We are made of star-stuff. We are a way for the Universe to know itself." - Carl Sagan***

The young minds of Classes I and II entered on a captivating journey through the cosmos during a series of Astronomy sessions. These engaging sessions introduced students to the wonders of space through exciting stories and intriguing facts. They learned about planets, stars, and celestial bodies, sparking their curiosity about the universe. The culmination of this celestial exploration was a thrilling final evening session where students had the opportunity to gaze at the night sky through a telescope. Under the guidance of expert astronomers, they were able to witness the magnificent rings of Saturn, the radiant glow of Venus, and the craters of the Moon, leaving them awestruck and inspired. This unforgettable experience ignited a lifelong passion for Astronomy in these young learners.

## Save Resources

***"When you put the whole picture together, recycling is the right thing to do."***

***– Pam Shoemaker***

In an inspiring initiative to promote environmental awareness, a competition was organized for the students of Class I on the theme 'Save Resources' on November 19, 2024. The young participants were tasked with creating models from waste or recycled materials and then presenting their creations to an audience. The goal was to encourage students to think creatively about reusing everyday items instead of sending them to landfills. The event showcased the incredible creativity and resourcefulness of the students. They transformed everyday waste into imaginative and functional models by using old newspapers, cardboard boxes, plastic bottles, and tin cans. After constructing their models, the students took to the stage to explain their creations. Their presentations were not only informative but also heartfelt, reflecting their understanding of environmental issues and their enthusiasm for making a difference. The competition not only encouraged students to think creatively but also instilled a sense of responsibility toward the environment. It was a fun and educational experience that emphasized the importance of sustainable practices from a young age.

## Decor Delights

***"The future is in our hands, let's make it sustainable."***

In a move towards a greener future, Class II students of DPS, GBN commenced a creative and eco-conscious initiative on November 22, 2024. The young learners created Pen stands using recycled and waste materials, demonstrating their commitment to sustainable living. This activity aligned perfectly with SDG 12, which focuses on responsible consumption and production. By repurposing discarded items, these budding environmentalists not only reduced waste but also introduced a sense of creativity and resourcefulness. In addition to crafting Pen stands, the students also decorated old items with decorative materials, getting new life into forgotten objects. This project encouraged the children to appreciate the value of existing items and think critically about their consumption habits. DPS, GBN is committed to nurture environmentally conscious citizens. Through this initiative, the School aimed to inspire young minds to adopt sustainable practices and contribute to a healthier planet.

## A Cosmic Journey: W.E. Theme 'Space Explorers-Odyssey'

The young minds of Classes I and II entered in an extraordinary journey through the vast expanse of the universe during the recent W.E. theme, 'Space Odyssey.' This exploration ignited curiosity and sparked imagination as students dived into the wonders of Space. They investigated into the fascinating world of Space and ISRO, uncovering intriguing facts and sharing their discoveries with enthusiasm. To bring their learning to life, they creatively constructed their own miniature Solar Systems using clay, showcasing their understanding of the celestial bodies. As budding astronauts, they expressed their aspirations and shared their dream destinations within the Solar System, explaining their reasons with imaginative flair. This immersive learning experience not only introduced a love for Science and exploration but also enhanced students' communication and creative skills.
